

Fees & Pricing

Standard Portfolios cost \$110 for a full website with up to 3 projects and Premium Portfolios cost \$220 for a full website with up to 4 projects. Each new site includes the initial process of creating the website and approval process, minor changes and hosting under my domain (ie www.first-last/yourdesignportfolio.com).

Additional projects and major revisions will incur extra fees of \$25 each.

Payment for initial portfolio site creation is due after the demo site has been reviewed by the client. Once I receive the list of necessary changes/adjustments I will work on completing the finalised site while the client sends through the amount they owe. Once the full amount has been received, the client will receive their custom link.

Payment for revisions is due after the updates have been reviewed by the client. Once I receive the list of necessary changes/adjustments I will work on completing the finalised site while the client sends through the amount they owe (\$25 or another agreed upon amount). Once the full amount has been received, the client's custom link will be reactivated.

DISCLAIMER: Links and webpages may not function during the revision process. It is advised that changes are not requested during times you are expecting people to be visiting the site (ie after applying for a job, going for an interview etc).

Refunds will not be issued for any reason as clients will review all demo sites/revisions before making a payment. All clients are responsible for checking their demo sites thoroughly to ensure all information is accurate and to their liking.
